

My name is Amber Warren and I am interested in applying for the Social worker position. I graduated from Cabrini College in 2016 earning my undergraduate degree in Criminology. Shortly after graduation I enrolled in the Master's program in Criminology at Cabrini. I have the expected graduation date of May 19th of 2019. I have always been fascinated with crime finding out why a person commits a criminal act and the process of the Criminal Justice system.

I have experience in analyzing statistical data, crisis intervention, the criminal justice process, victim advocacy, and crime mapping data. While receiving my undergraduate degree I tutored students in Political Science and Religion courses. I was the President of the Criminology club during my Junior year of college. That role allowed me to work within the community. My club put together basic needs sending packages out to individuals at the Salvation Army during Christmas time.

While at Victim Services Center I mentored interns allowing them to shadow me and gain hands on experiences with working with victims. As a victim advocate I would go to police departments within Montgomery County and train law enforcement officials on sexual assault, reporting, and advocacy. I held trainings local providers in Montgomery County teaching them about the Criminal Justice process starting with reporting ending with sentencing in front of a Judge.

I work well with others and I enjoy working with victims of crime. I have experience with working with different backgrounds I am **culturally** aware as I myself come from a diverse background. I have spent many **hours** sitting in a courtroom soaking up information about the criminal justice system. This knowledge allowed me to relate information to victims who have not gone through the process before. Giving back power to victims who have lost it is something I am very passionate about. I would greatly appreciate the opportunity to meet with you and discuss my interests and qualifications.
