To Whom It May Concern:

I am very pleased to write a letter of recommendation for Karen Dorman. I've known Ms. Dorman for 28 years and during that time my respect for her has continued to grow. From June 1990 until June of 1992, I was the Coordinator of the department at Mercy Hospice where Ms. Dorman worked as a case manager. In this capacity, I was able to observe her closely in her work with the women and children there. Mercy Hospice was a shelter for homeless women and children, providing a range of services in its efforts to assist them. Ms. Dorman brought to our agency and to her clients a broad range of talents.

Ms. Dorman is gifted with intuition, empathy and insight. This allows her to communicate therapeutically no matter how challenging the client or situation. She is always willing to use her considerable creative strength, searching for richer and deeper means of expression and growth for her clients. She is also professional, trustworthy and clear. Ms. Dorman was consistently organized and so was able to be productive not only for her clients but for the agency as a whole. We often relied on her to help work out staff issues and to look at new ways of approaching problems. She is extraordinarily honest.

I know Karen Dorman will bring enormous skill to any situation she chooses. I trust her abilities and am grateful to have seen this gifted women work.

Sincerely,

A handwritten signature in cursive script that reads "Karen A. Wisniewski, R.N.".
